

9-3-86

I arrived on the ~~2nd~~ truck on the scene. Upon arrival I carried one of two pike poles to the fire scene. Both pike poles were used to remove debris from the west(?) wall of the structure. I saw a bicycle and a metal can removed the inside of the west(?) wall. These items were moved to the side, out of the way. The metal can was open and had liquid in it at the time. The wall had burnt away partially.
