

9-3-86

Received fire call approx. 4:55 pm on 26 Aug. 1986. I was on the last truck to arrive. Reported to Chief Don Ford who instructed Larry Adkins & myself to report to the ~~area~~ Dpt. Chief Lucany. He instructed us to assist in overhaul operations. As the front of the shed was gone, I went to the rear to pull down the rear wall. At this time I was told that there was a body in the shed & to stop overhaul. I went to the south side (door side) of the building & was shown the location of the body.

Larry Adkins & I were then told that there was another boy missing & we began a search in the shed for the second boy. We found the second boy in the far corner of the building & reported that fact. After that, I was just standing by until relieved.

My overall impression of the fire was that it started in the area of the shed door & was intense enough that the boys could not get out.
